

Telecom Cloud Intelligence Platform - Infrastructure Report

Active Containers:

- 1) telecom-cloud-intelligence-api-gateway-1
Image: telecom-cloud-intelligence-api-gateway
Ports: 0.0.0.0:8000 -> 8000/tcp
Command: uvicorn main:app --host 0.0.0.0 --port 8000
- 2) telecom-cloud-intelligence-ai-service-1
Image: telecom-cloud-intelligence-ai-service
Ports: 0.0.0.0:8001 -> 8001/tcp
Command: uvicorn main:app --host 0.0.0.0 --port 8001
- 3) telecom-cloud-intelligence-pipeline-worker-1
Image: telecom-cloud-intelligence-pipeline-worker
Ports: None (internal service)
Command: python -m worker
- 4) telecom-cloud-intelligence-postgres-1
Image: postgres:16
Ports: 0.0.0.0:5432 -> 5432/tcp
Status: Healthy
- 5) telecom-cloud-intelligence-minio-1
Image: minio/minio:latest
Ports: 0.0.0.0:9000-9001 -> 9000-9001/tcp
Status: Healthy

Network Architecture:

- API Gateway exposed on port 8000
- AI Service exposed on port 8001
- PostgreSQL database exposed on port 5432
- MinIO object storage exposed on ports 9000 (API) and 9001 (Console)
- Pipeline Worker operates internally within Docker network

System Status:

- All core services running
- Health endpoints operational
- OpenAPI documentation accessible
